User flow & requirement coverage

SRS 6.1 · all FRs

REQUIREMENT	WHERE IT IS SHOWN
FR-1.1 Register with email & password	Sign up (strength meter, live rules)
FR-1.2 Log in securely	Log in, 15-min session timeout warning
FR-2.1 / 2.2 Upload & parse resume	Dashboard drop zone, “We found 5 sections and 14 bullets”
FR-3.1 / 3.2 Job posting via URL or text	Job posting tabs, “We pulled 21 keywords”
FR-4.1 / 4.2 Score + matched / missing / weak	Match results ring and keyword lists
FR-5.1 – 5.3 Select, generate, save bullets	Results bullet picker, Improve screen
FR-6.1 Export as PDF	Export preview, Confirmation
NFR-4.1 – 4.3 Failure handling	Unreadable file row, URL fallback, AI outage (page 15)
NFR-3.3 / 3.4 Responsive, tooltips	Mobile views, tooltips on icon buttons, Help

Global navigation

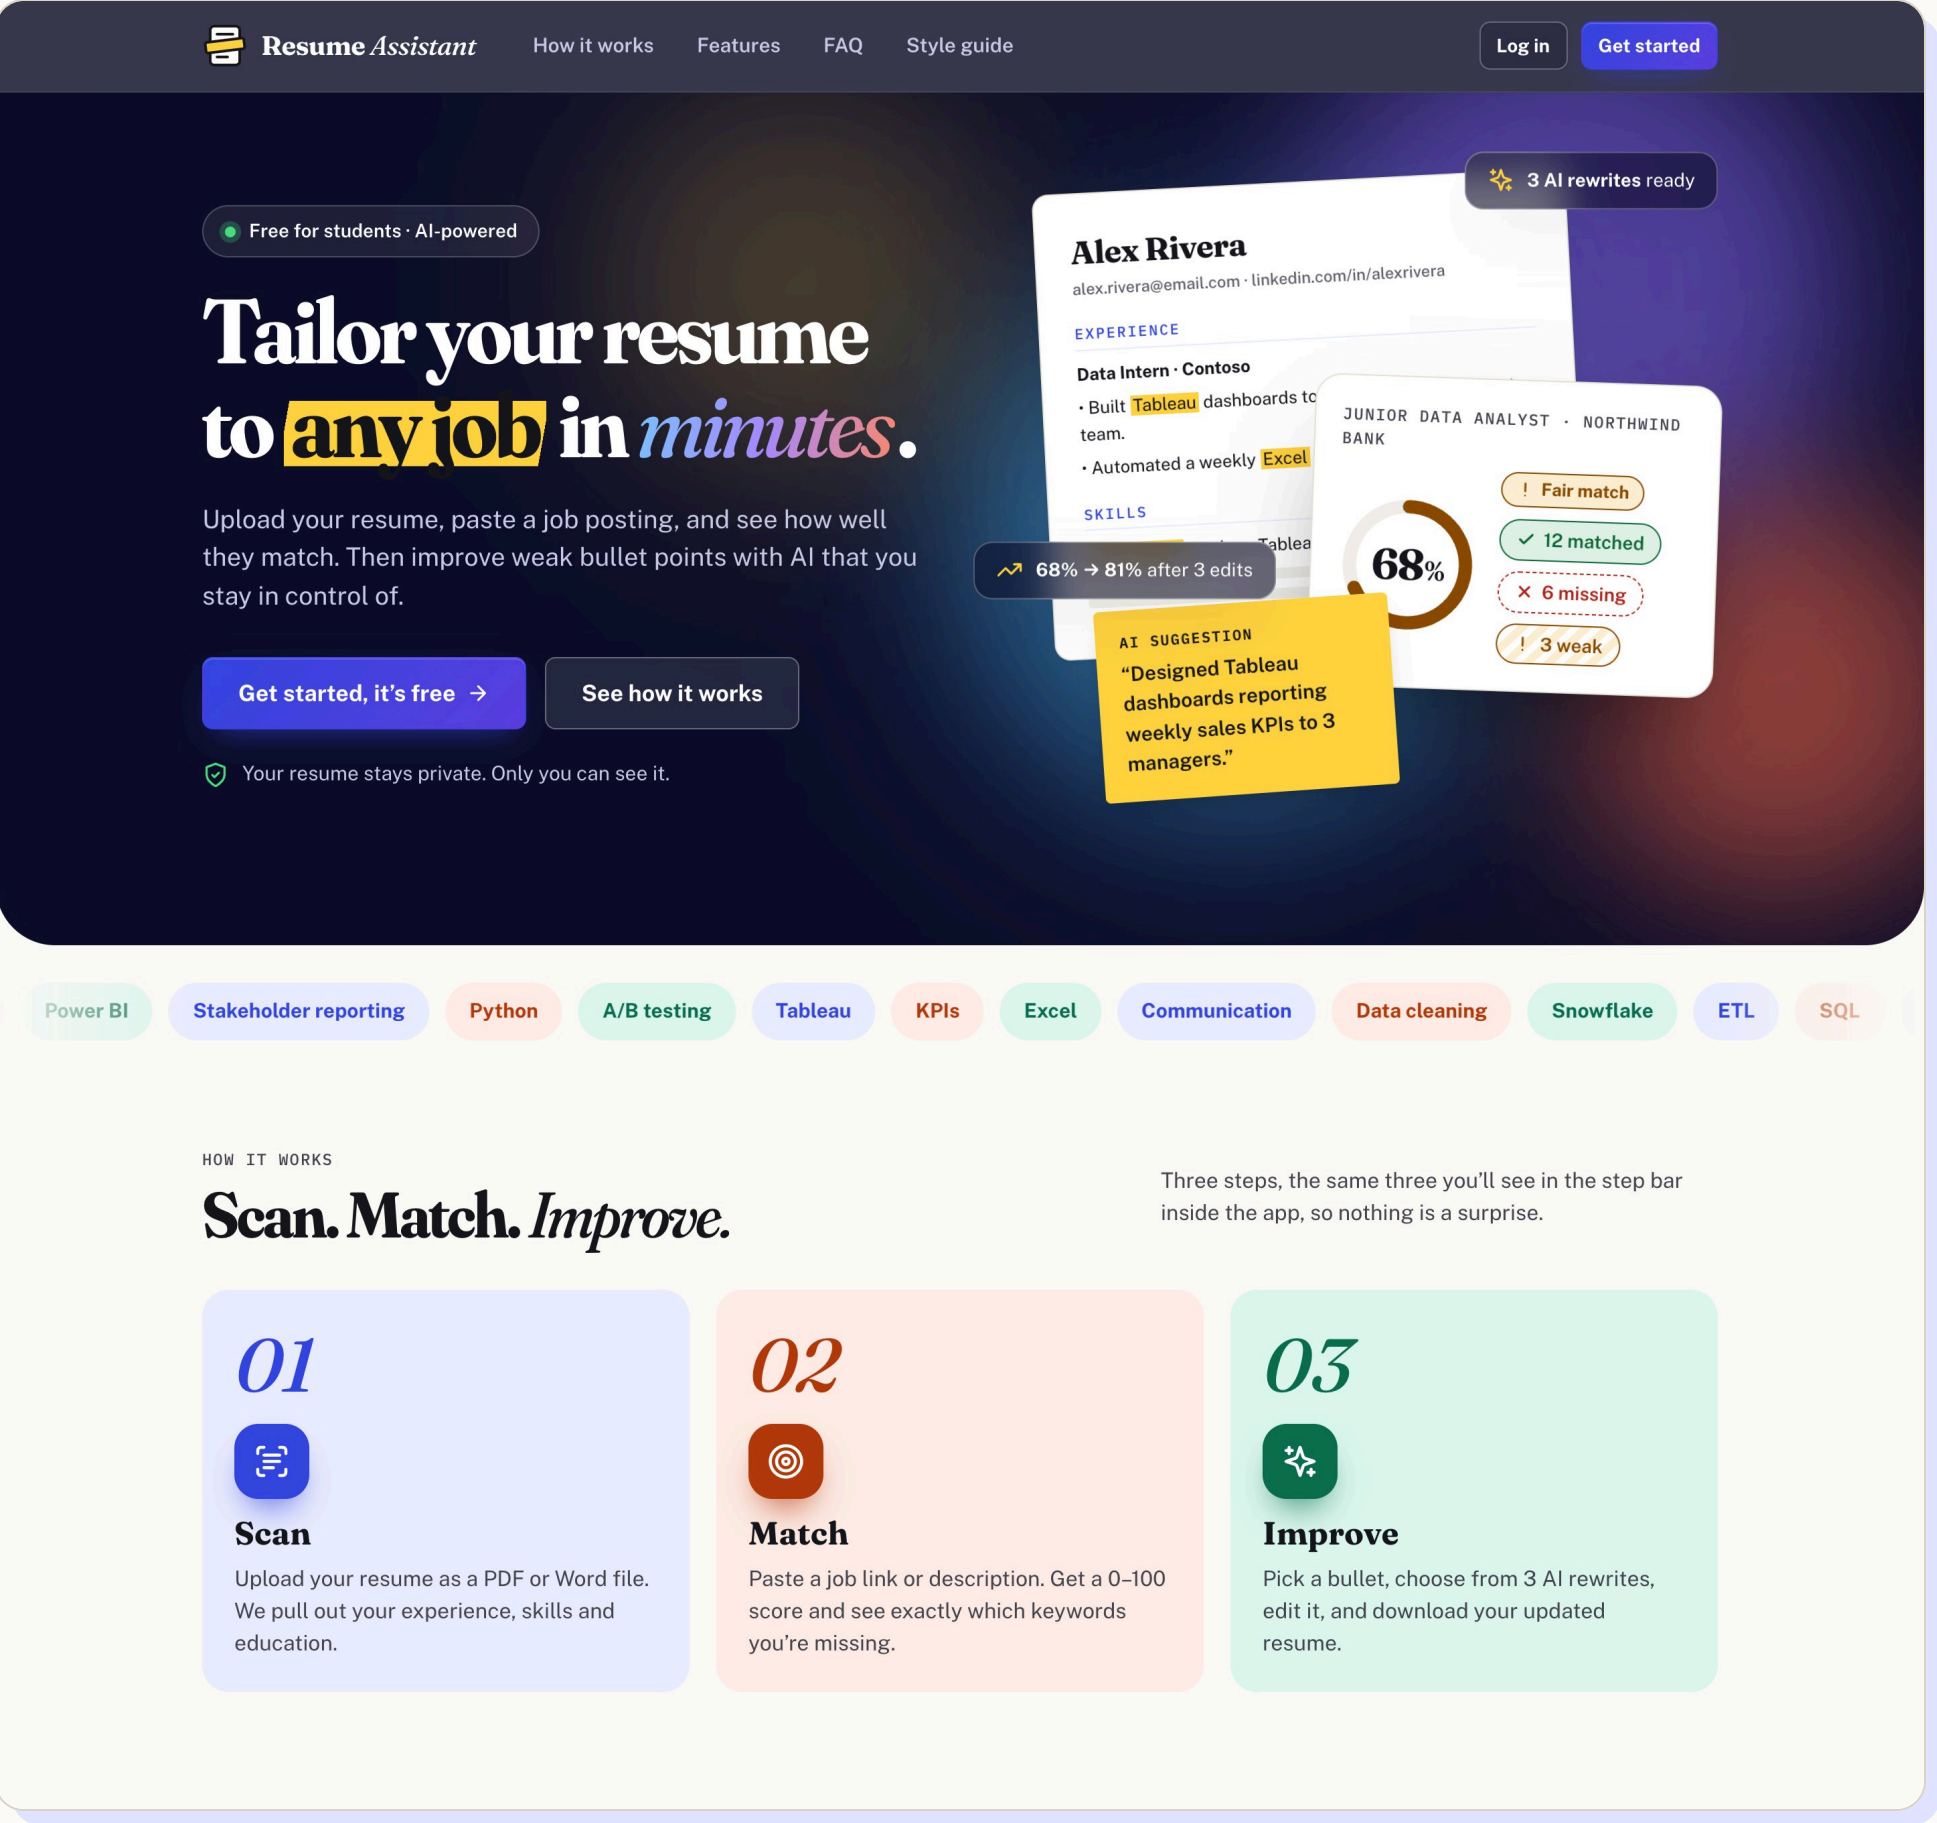

Same top bar on every signed-in page: Dashboard · New analysis · My analyses, plus Help and the account menu (Settings, Accessibility, Log out). Every page has a Back button.

Recovery paths

Link can’t be read → paste description. AI unavailable → edit manually. Scanned PDF → re-upload tip. Delete → confirm dialog + Undo.

Try it live

<https://claude.ai/artifact/C5V1nGPEJdDgfddezJftwcR>

03

Welcome

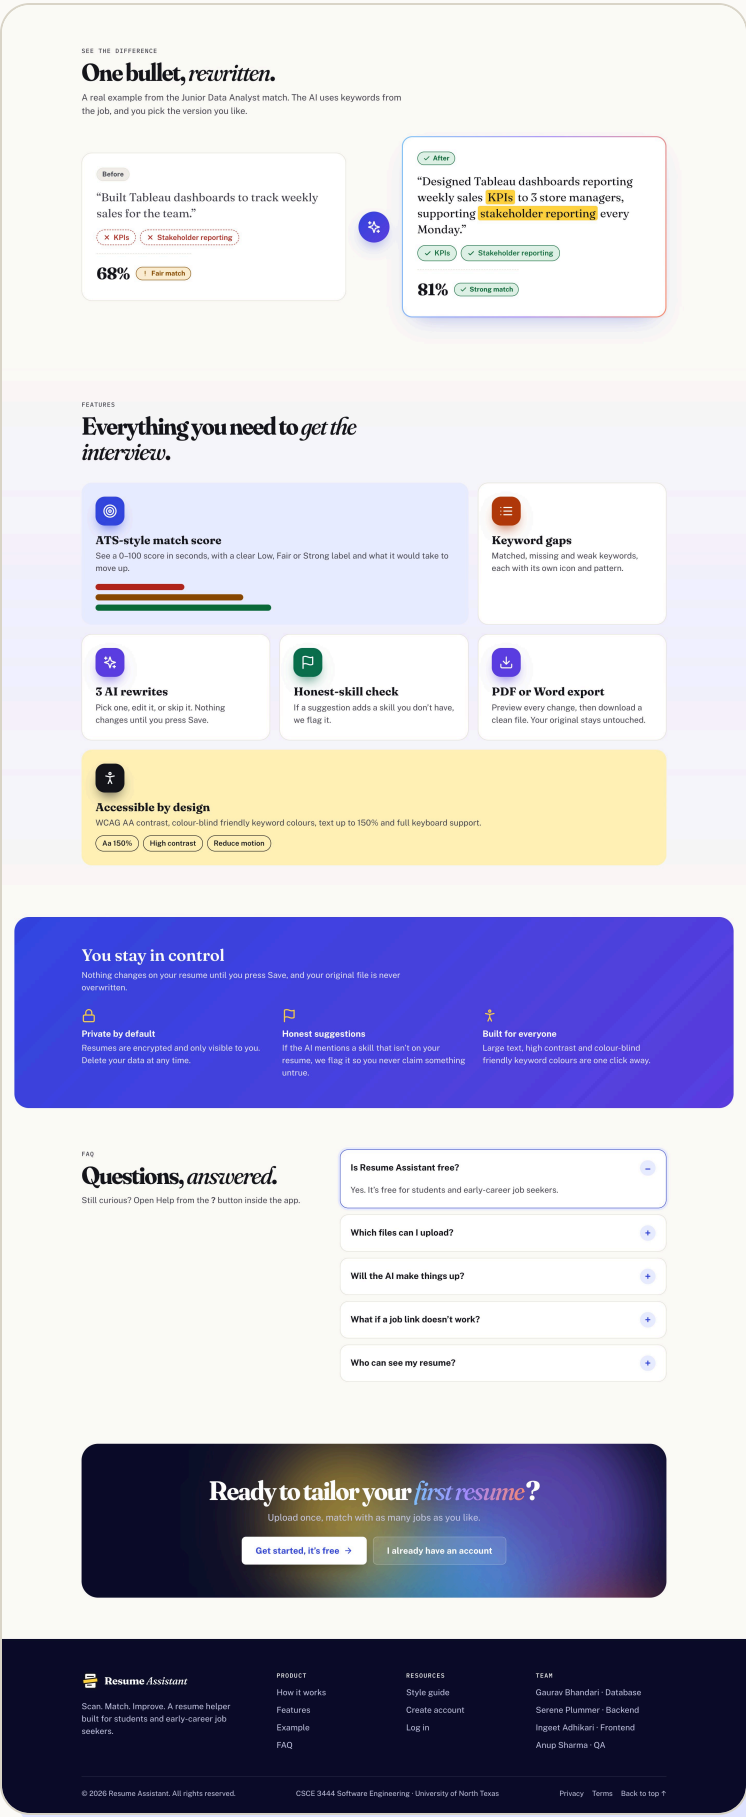

Landing page · SRS 1.2

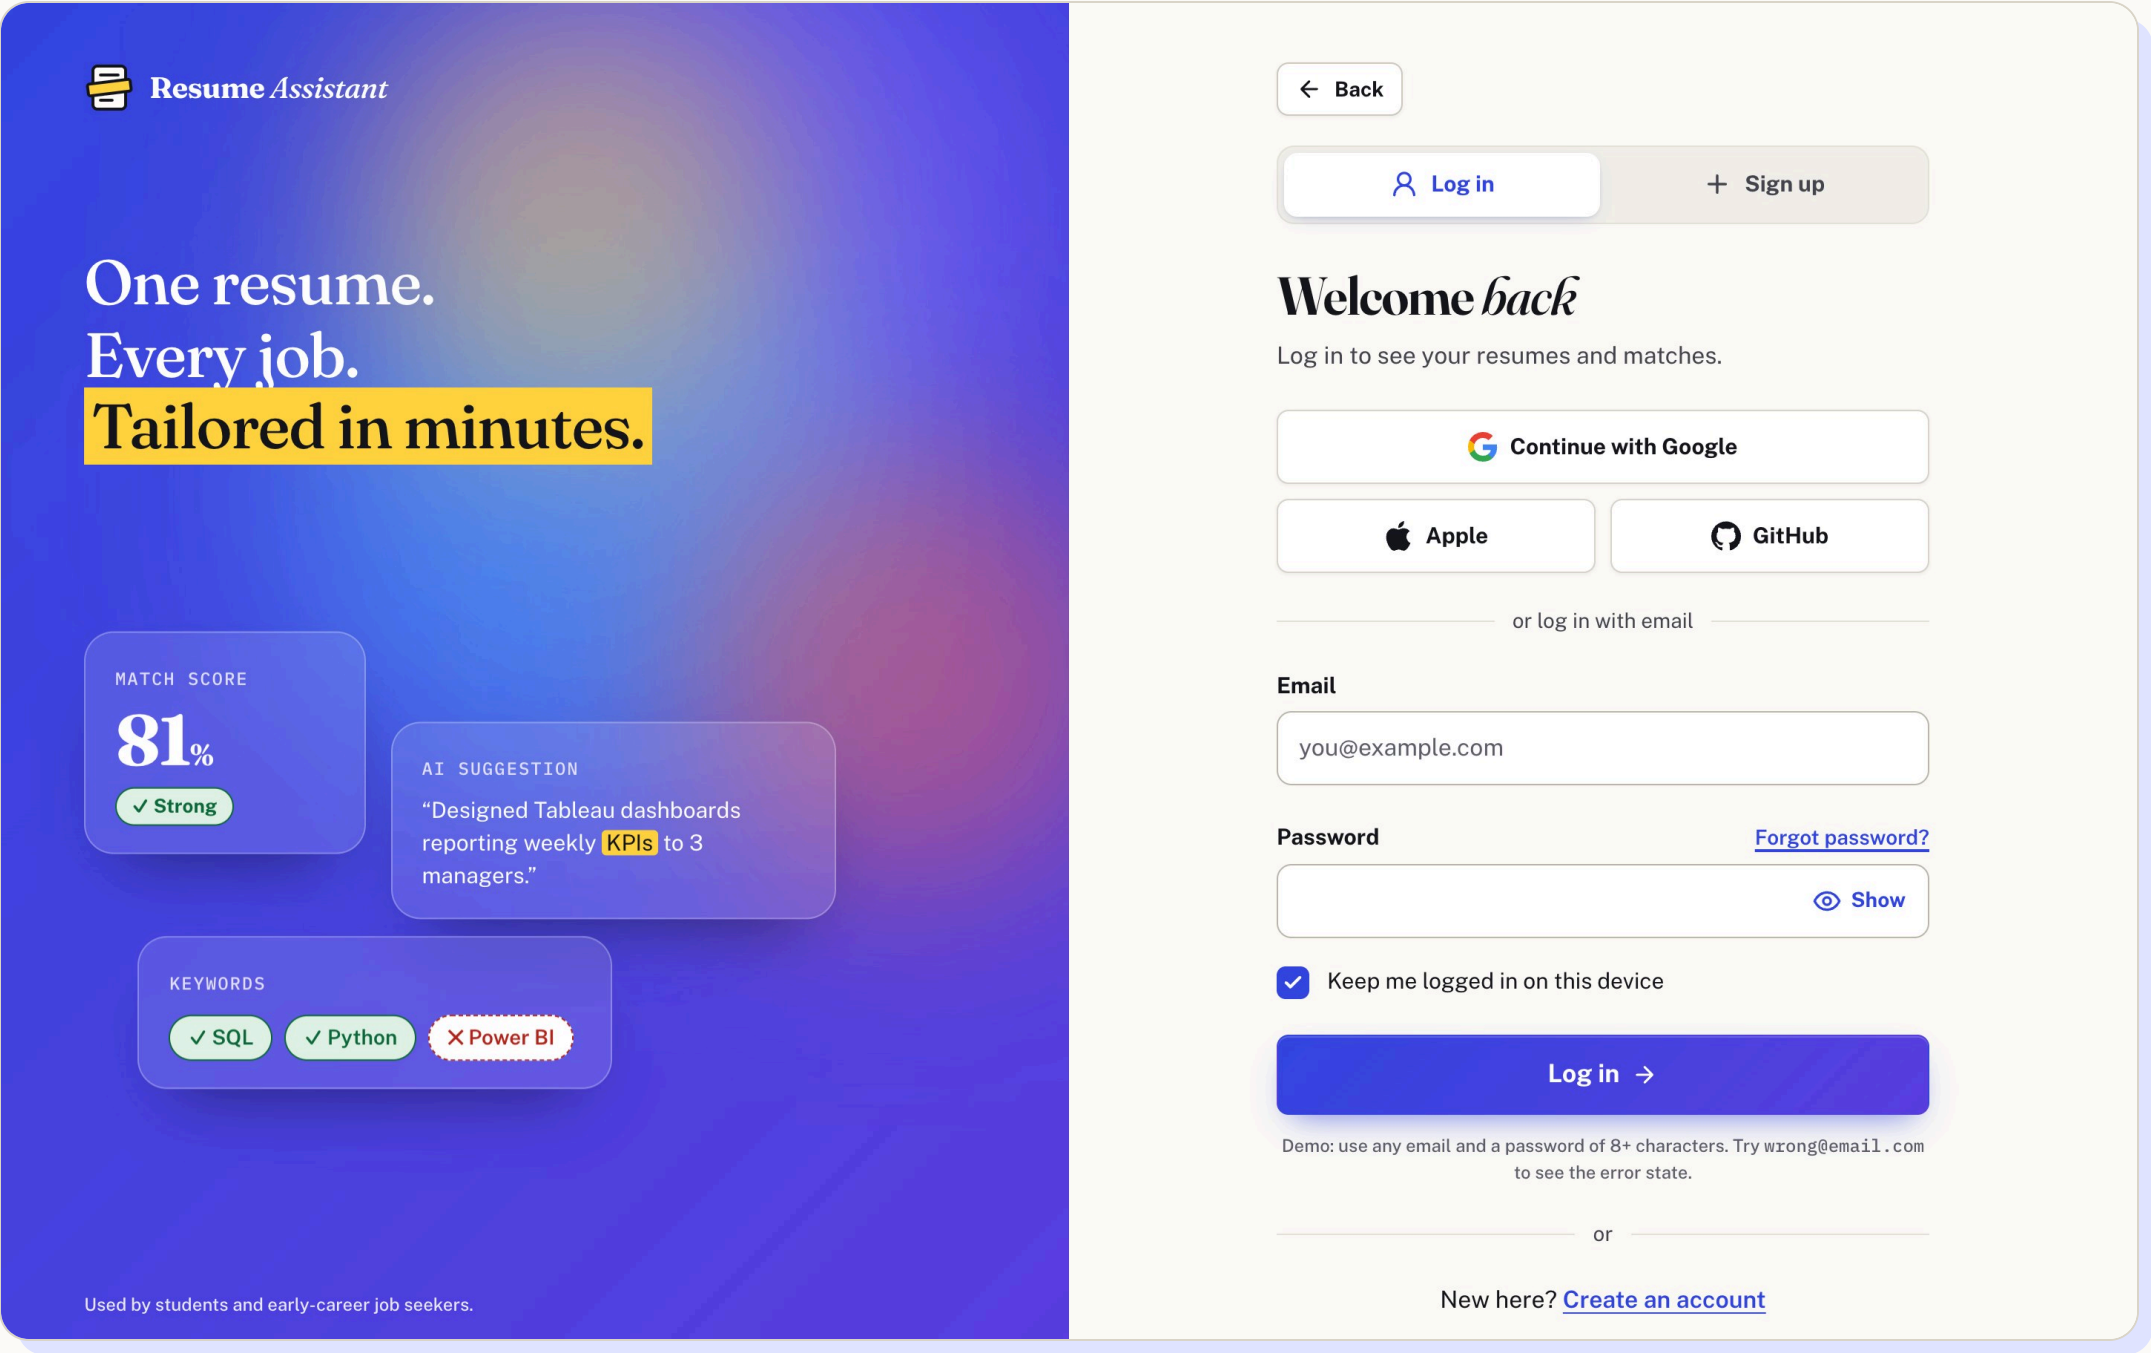

- 1 One-sentence value proposition with a highlighter swipe on “any job”.
- 2 One primary action (Get started); Log in is secondary.
- 3 Example preview uses the real score card, so users know what they’ll get.
- 4 Scan · Match · Improve uses the same words as the in-app step bar (recognition over recall).
- 5 Privacy line answers the trust question before it’s asked.

Welcome • rest of the page

Landing page • footer

- 1 Before / after example shows exactly what the AI does, with the score change.
- 2 Feature grid: each feature has its own colour and icon, matching the app.
- 3 FAQ uses native disclosure buttons, so it works with keyboard and screen readers.
- 4 Final call to action repeats the one primary button.
- 5 Footer with product links, team credits and © 2026 copyright.

05

Log in

FR-1.1 · Screen 1

- 1 Log in and Sign up share one card with a tab switch (consistency).
- 2 One-click sign in with Google, Apple or GitHub, or use email.
- 3 Show/Hide password and a Caps Lock warning prevent common errors.
- 4 Wrong credentials give one plain-English message that doesn't reveal which field was wrong.
- 5 Labels always sit above fields; focus ring is a 3 px blue outline.

One resume.
Every job.
Tailored in minutes.

MATCH SCORE

81%

✓ Strong

AI SUGGESTION

“Designed Tableau dashboards reporting weekly KPIs to 3 managers.”

KEYWORDS

✓ SQL

✓ Python

✗ Power BI

Used by students and early-career job seekers.

Create account

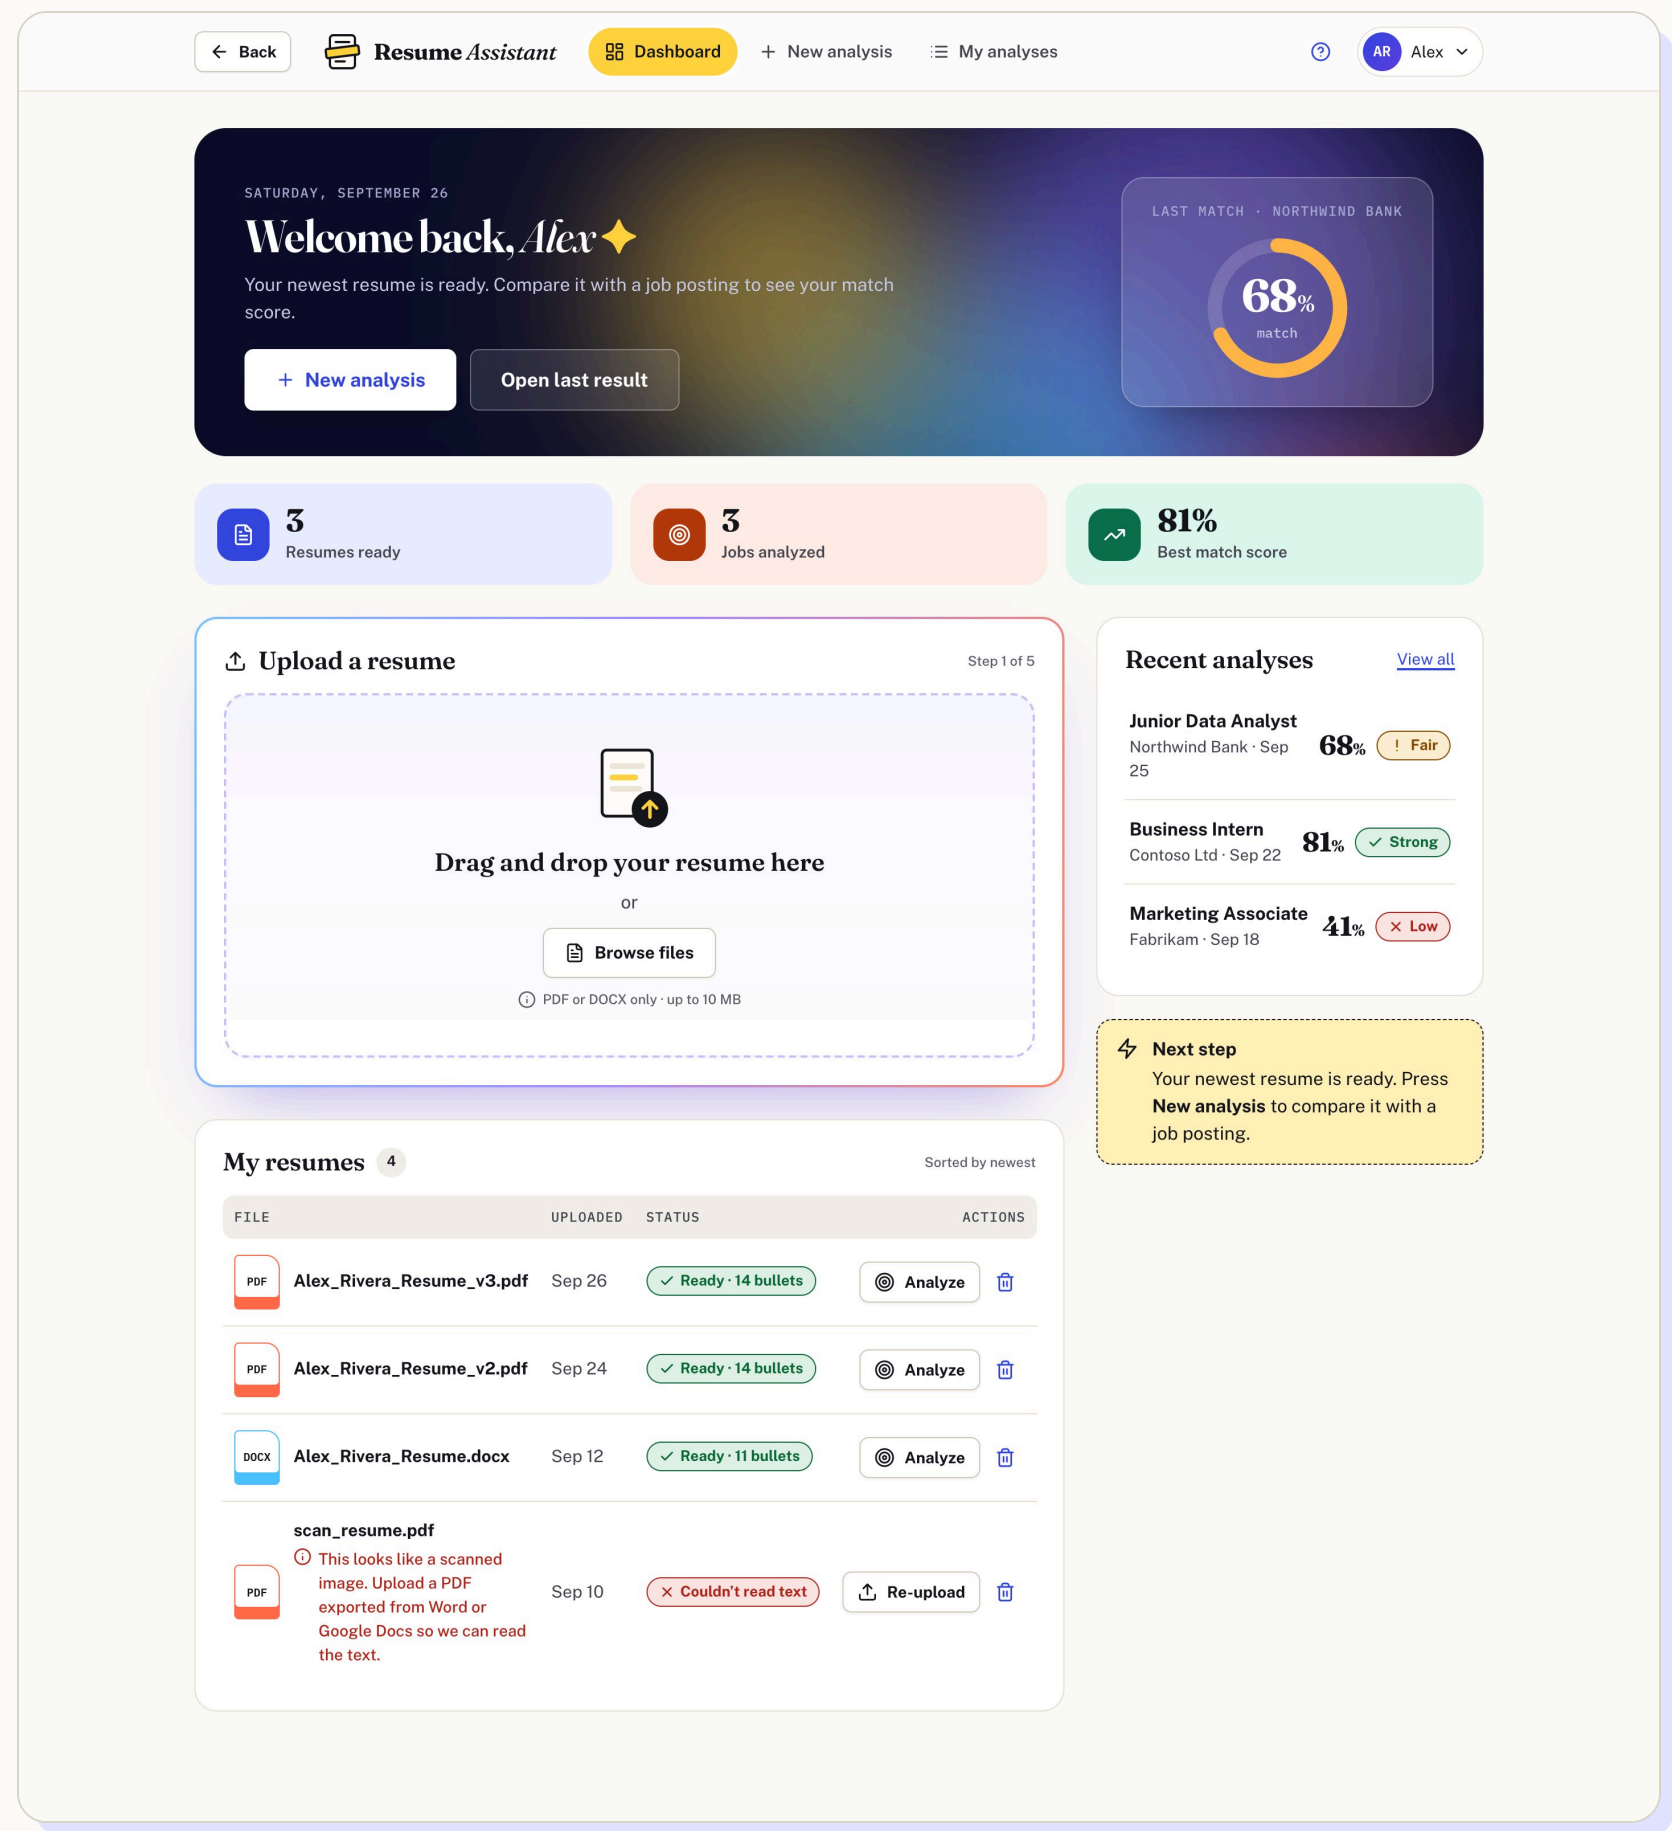

Complete the required fields to continue.

06

Sign up

FR-1.1 · error prevention

- 1 Password rules are a live checklist with ✓ / ✗ icons, not just colour.
- 2 Strength meter uses segments and a word (“Good, 3 of 4”).
- 3 Fields validate when you leave them, not on every keystroke.
- 4 Create account stays disabled until everything is valid, and says why.

07

Dashboard

FR-2.1 · FR-2.2 · NFR-4.1

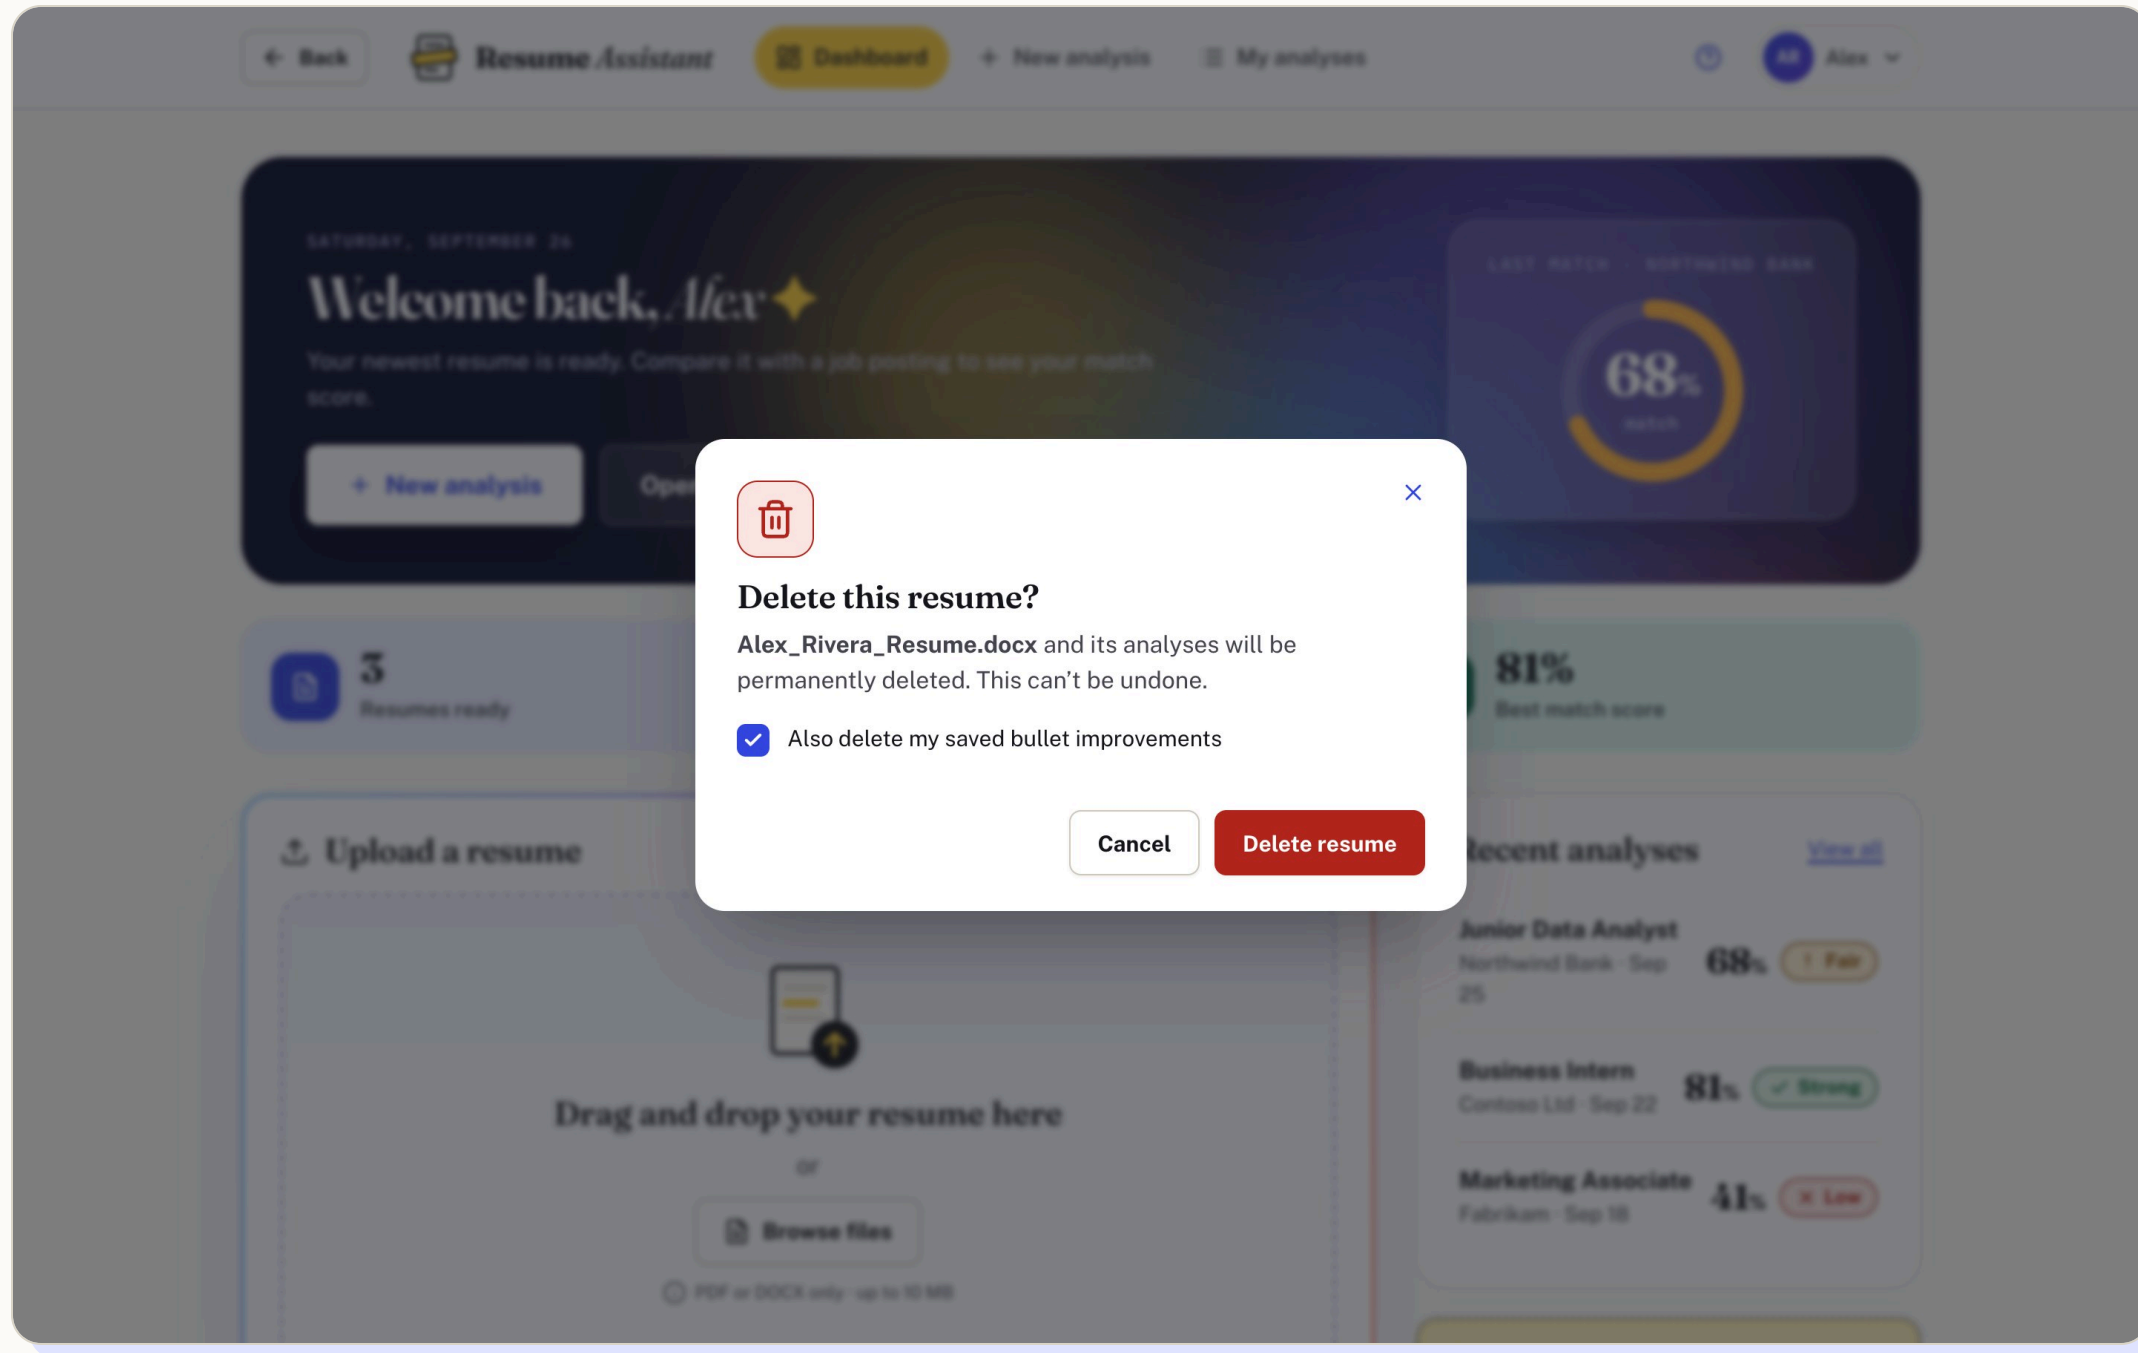

- 1 Big drag-and-drop zone that also works with Browse files (keyboard, mobile).
- 2 File rules (PDF/DOCX, 10 MB) are shown before upload.
- 3 A resume that couldn't be read explains why and offers one-click Re-upload.
- 4 Recent analyses show score + label + icon so users pick up where they left off.

08

Confirmation dialog

Error prevention

- 1 Destructive actions always ask first and name exactly what will be lost.
- 2 Focus starts on Cancel; the red button says “Delete resume”, not “OK”.
- 3 Esc, X or clicking outside closes the dialog.
- 4 After deleting, a toast offers Undo.

09

Main feature 1 • Job posting

FR-3.1 • FR-3.2 • NFR-4.2

- 1 Step bar shows step 2 of 5: done steps have a check, the current one is yellow.
- 2 Two input methods as tabs with icon + label; typed text is kept when switching.
- 3 Shown here: the link couldn't be read, so the app offers "Paste description instead" in one click.
- 4 The chosen resume stays visible on the right.

RESUME BEING MATCHED

 Alex_Rivera_Resume_v3.pdf

14 bullets · 5 sections

[Change resume](#)

 Tips for best results

- Include the full "Requirements" and "Responsibilities" sections.
- One job per analysis. You can run as many as you like.
- We never apply to jobs or contact employers for you.

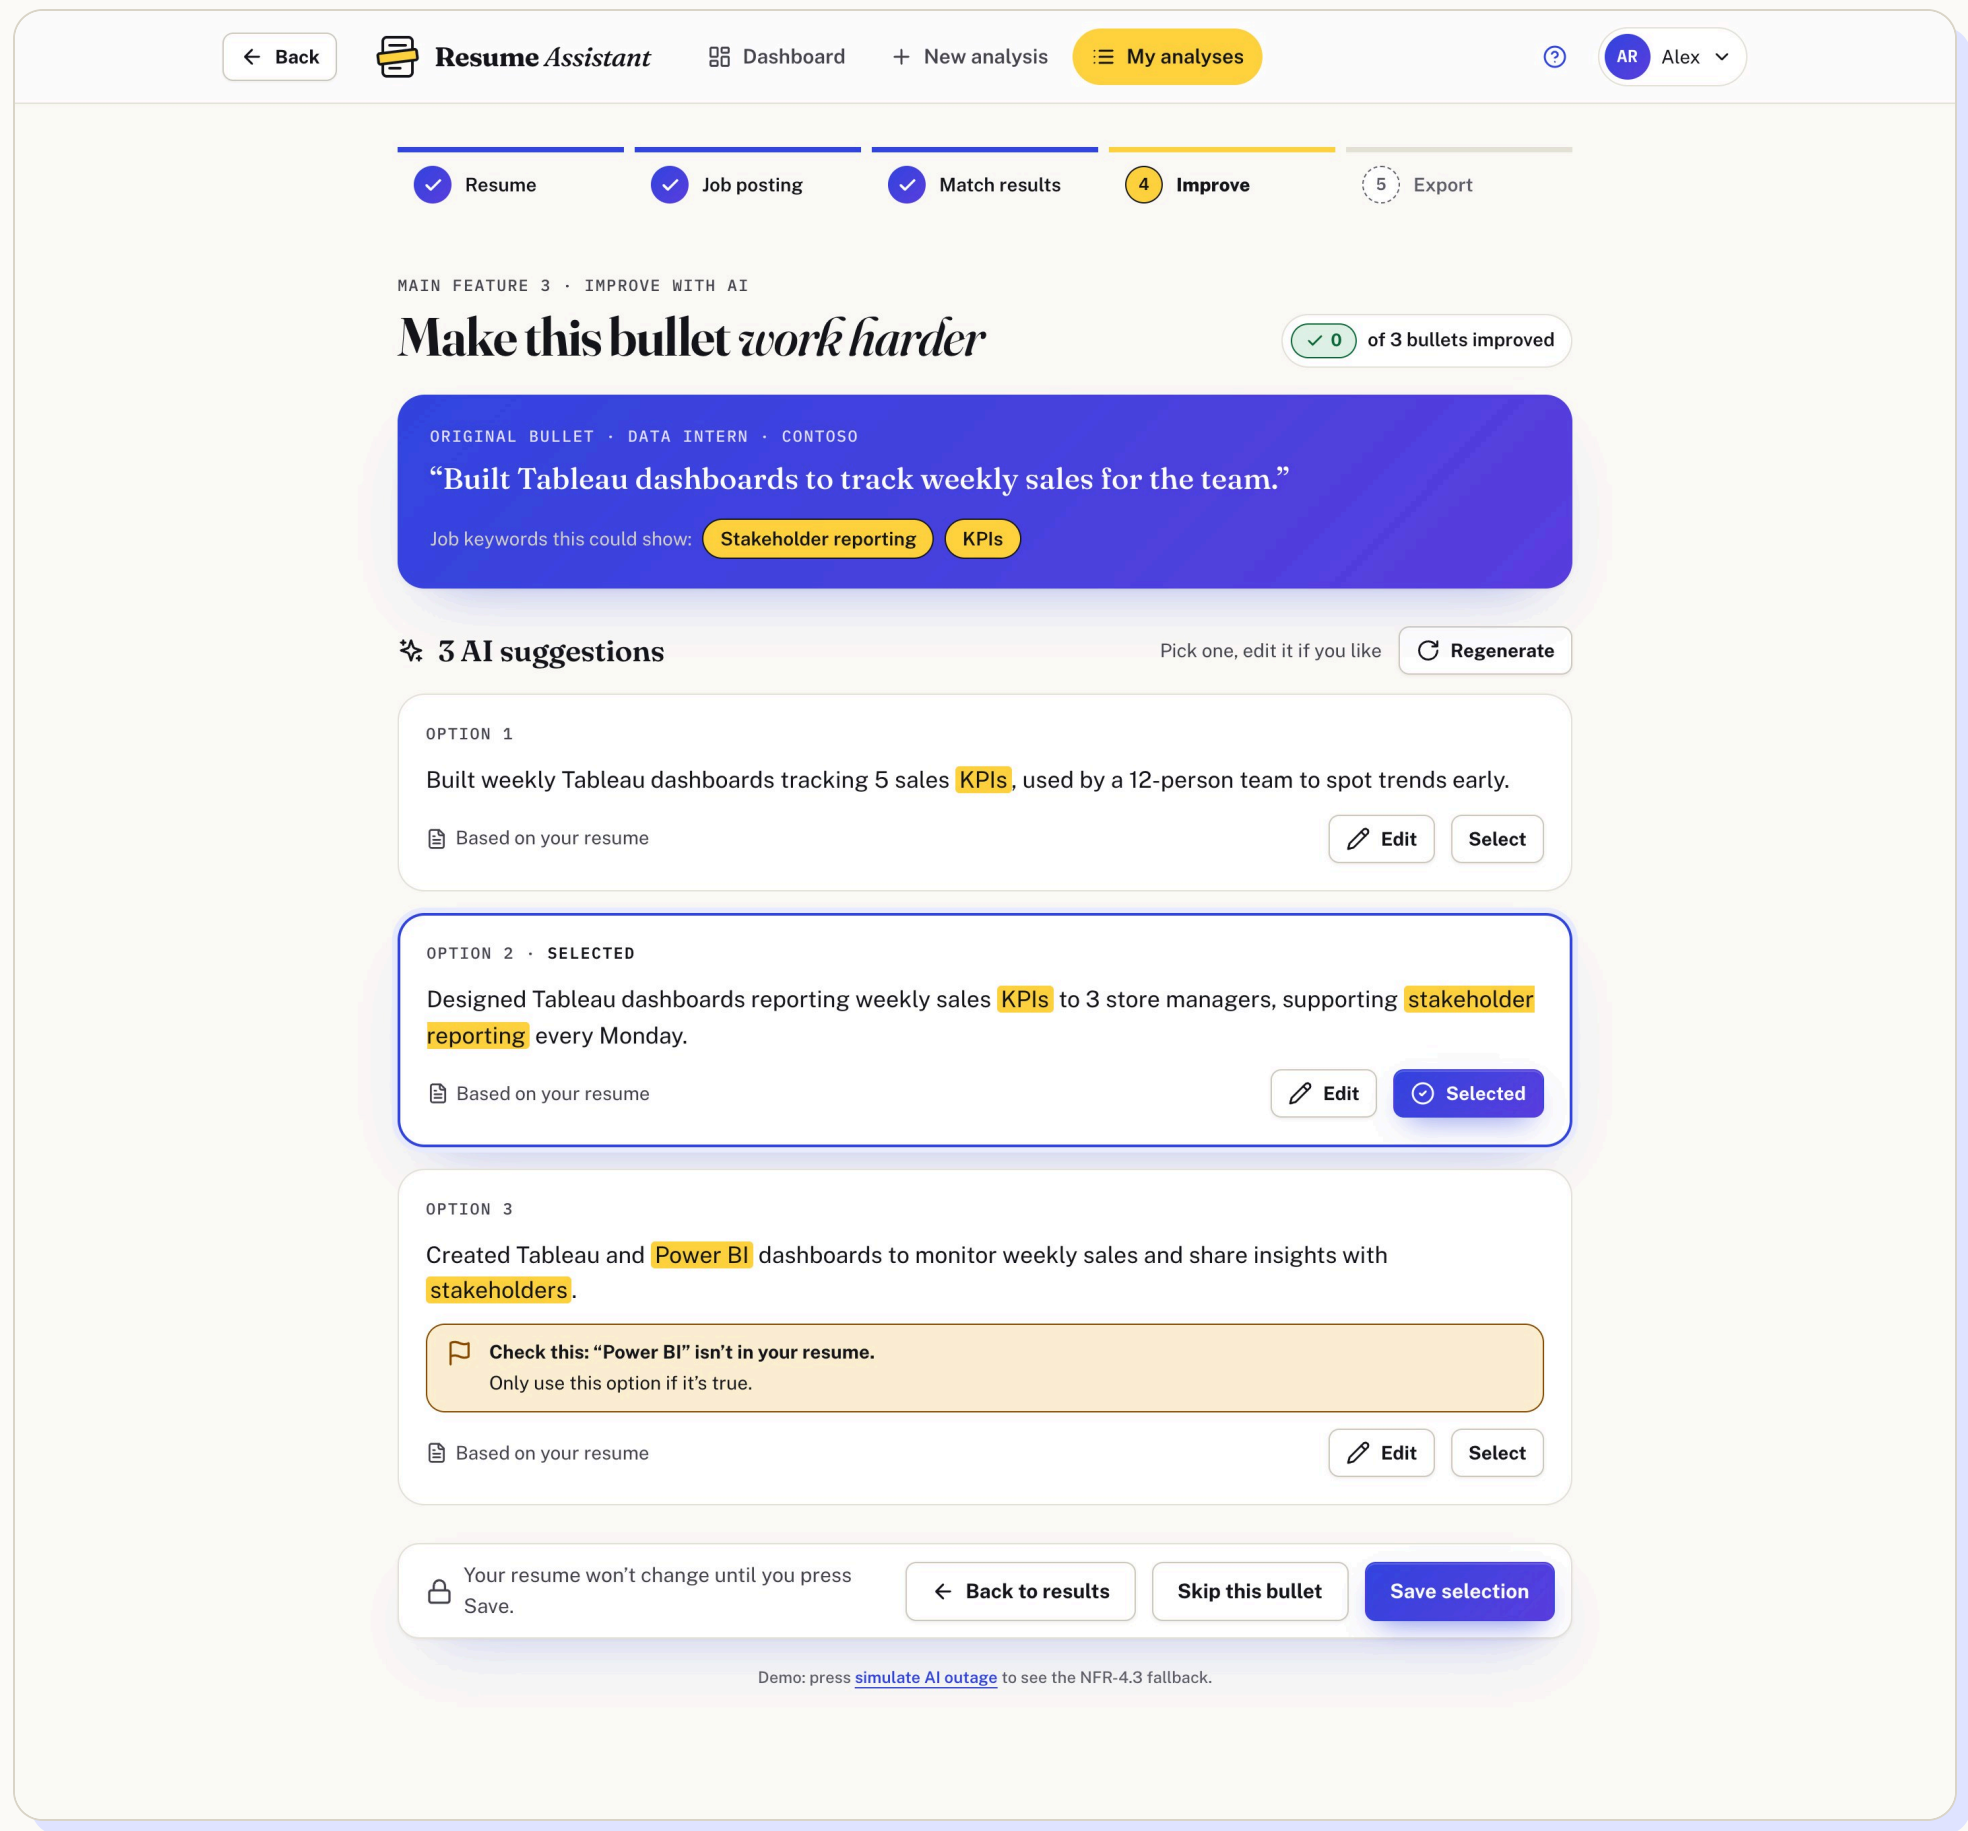

10

Main feature 2 • Match results

FR-4.1 · FR-4.2 · FR-5.1

- 1 Score is a number, a ring, a word (“Fair”) and an icon, with a legend of ranges.
- 2 Keywords split into Matched (solid ✓), Missing (dashed ✕) and Weak (striped !).
- 3 Recommendations say “if you’ve used...” so users don’t add skills they don’t have.
- 4 Select a bullet to improve; the selected one gets a thick border and a filled radio.

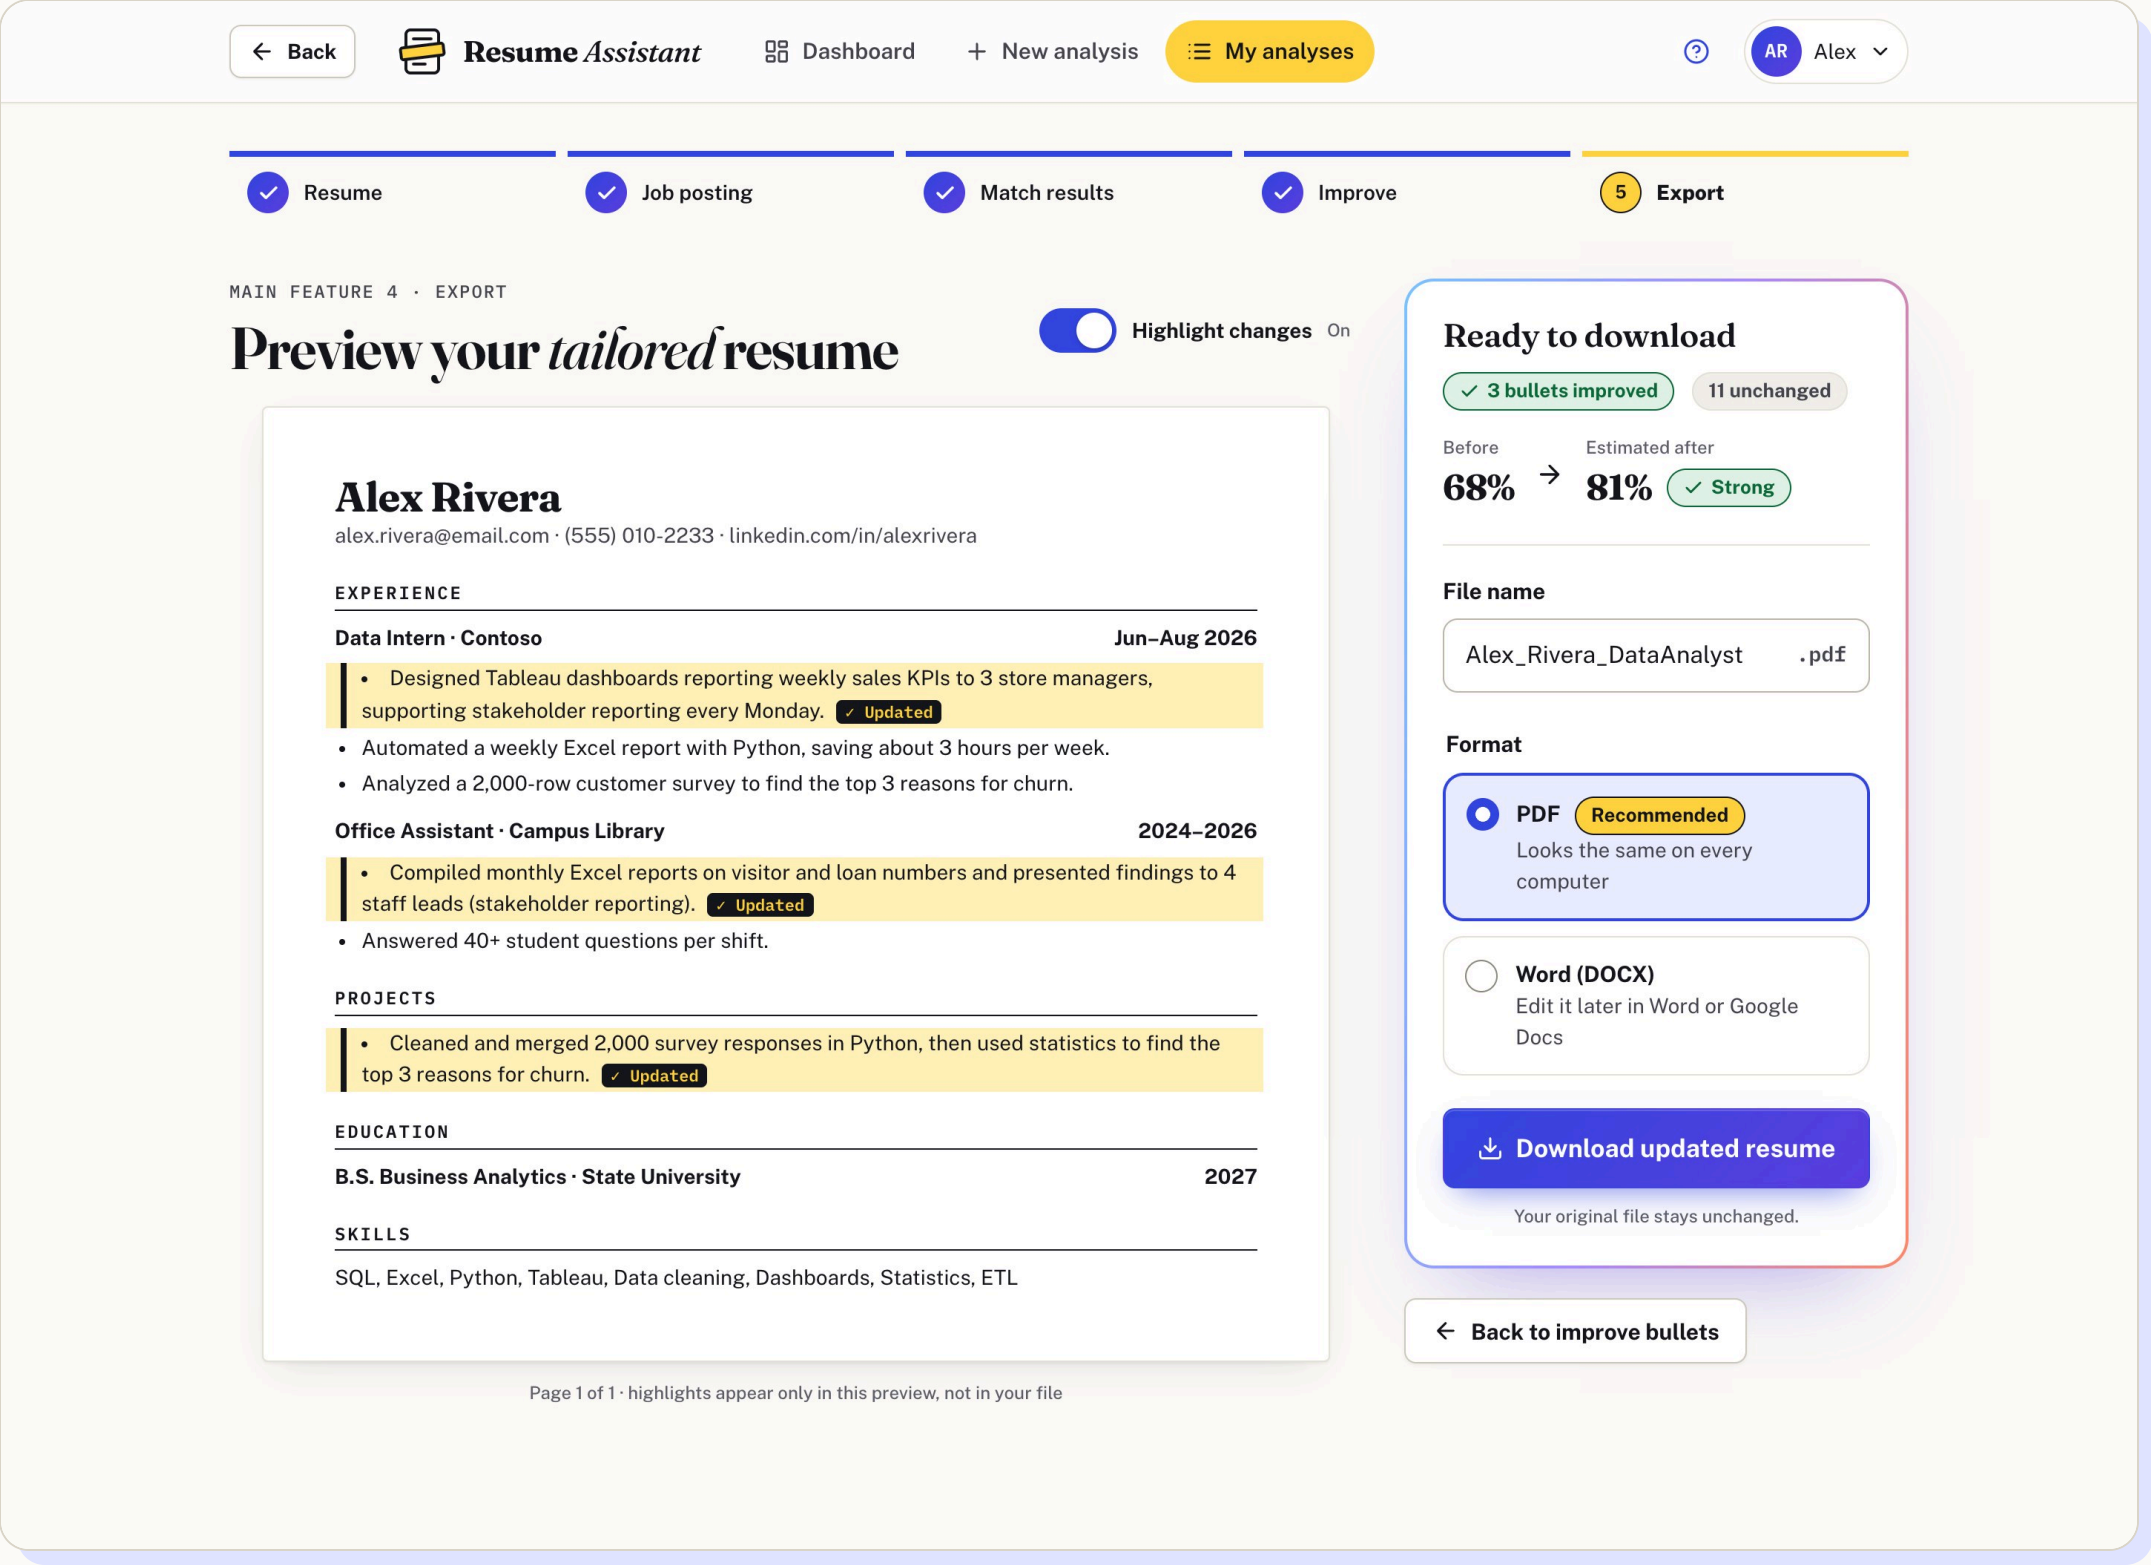

11

Main feature 3 • Improve with AI

FR-5.2 · FR-5.3 · NFR-4.3

- 1 The original bullet stays on top in dark ink for easy comparison.
- 2 Three numbered options, each with Edit and Select; the selected one gets an indigo outline and the word “Selected”.
- 3 Option 3 is flagged: “Power BI isn’t in your resume” (hallucination check).
- 4 Sticky action bar: nothing changes until Save, and Save gives an Undo toast.

12

Main feature 4 • Export

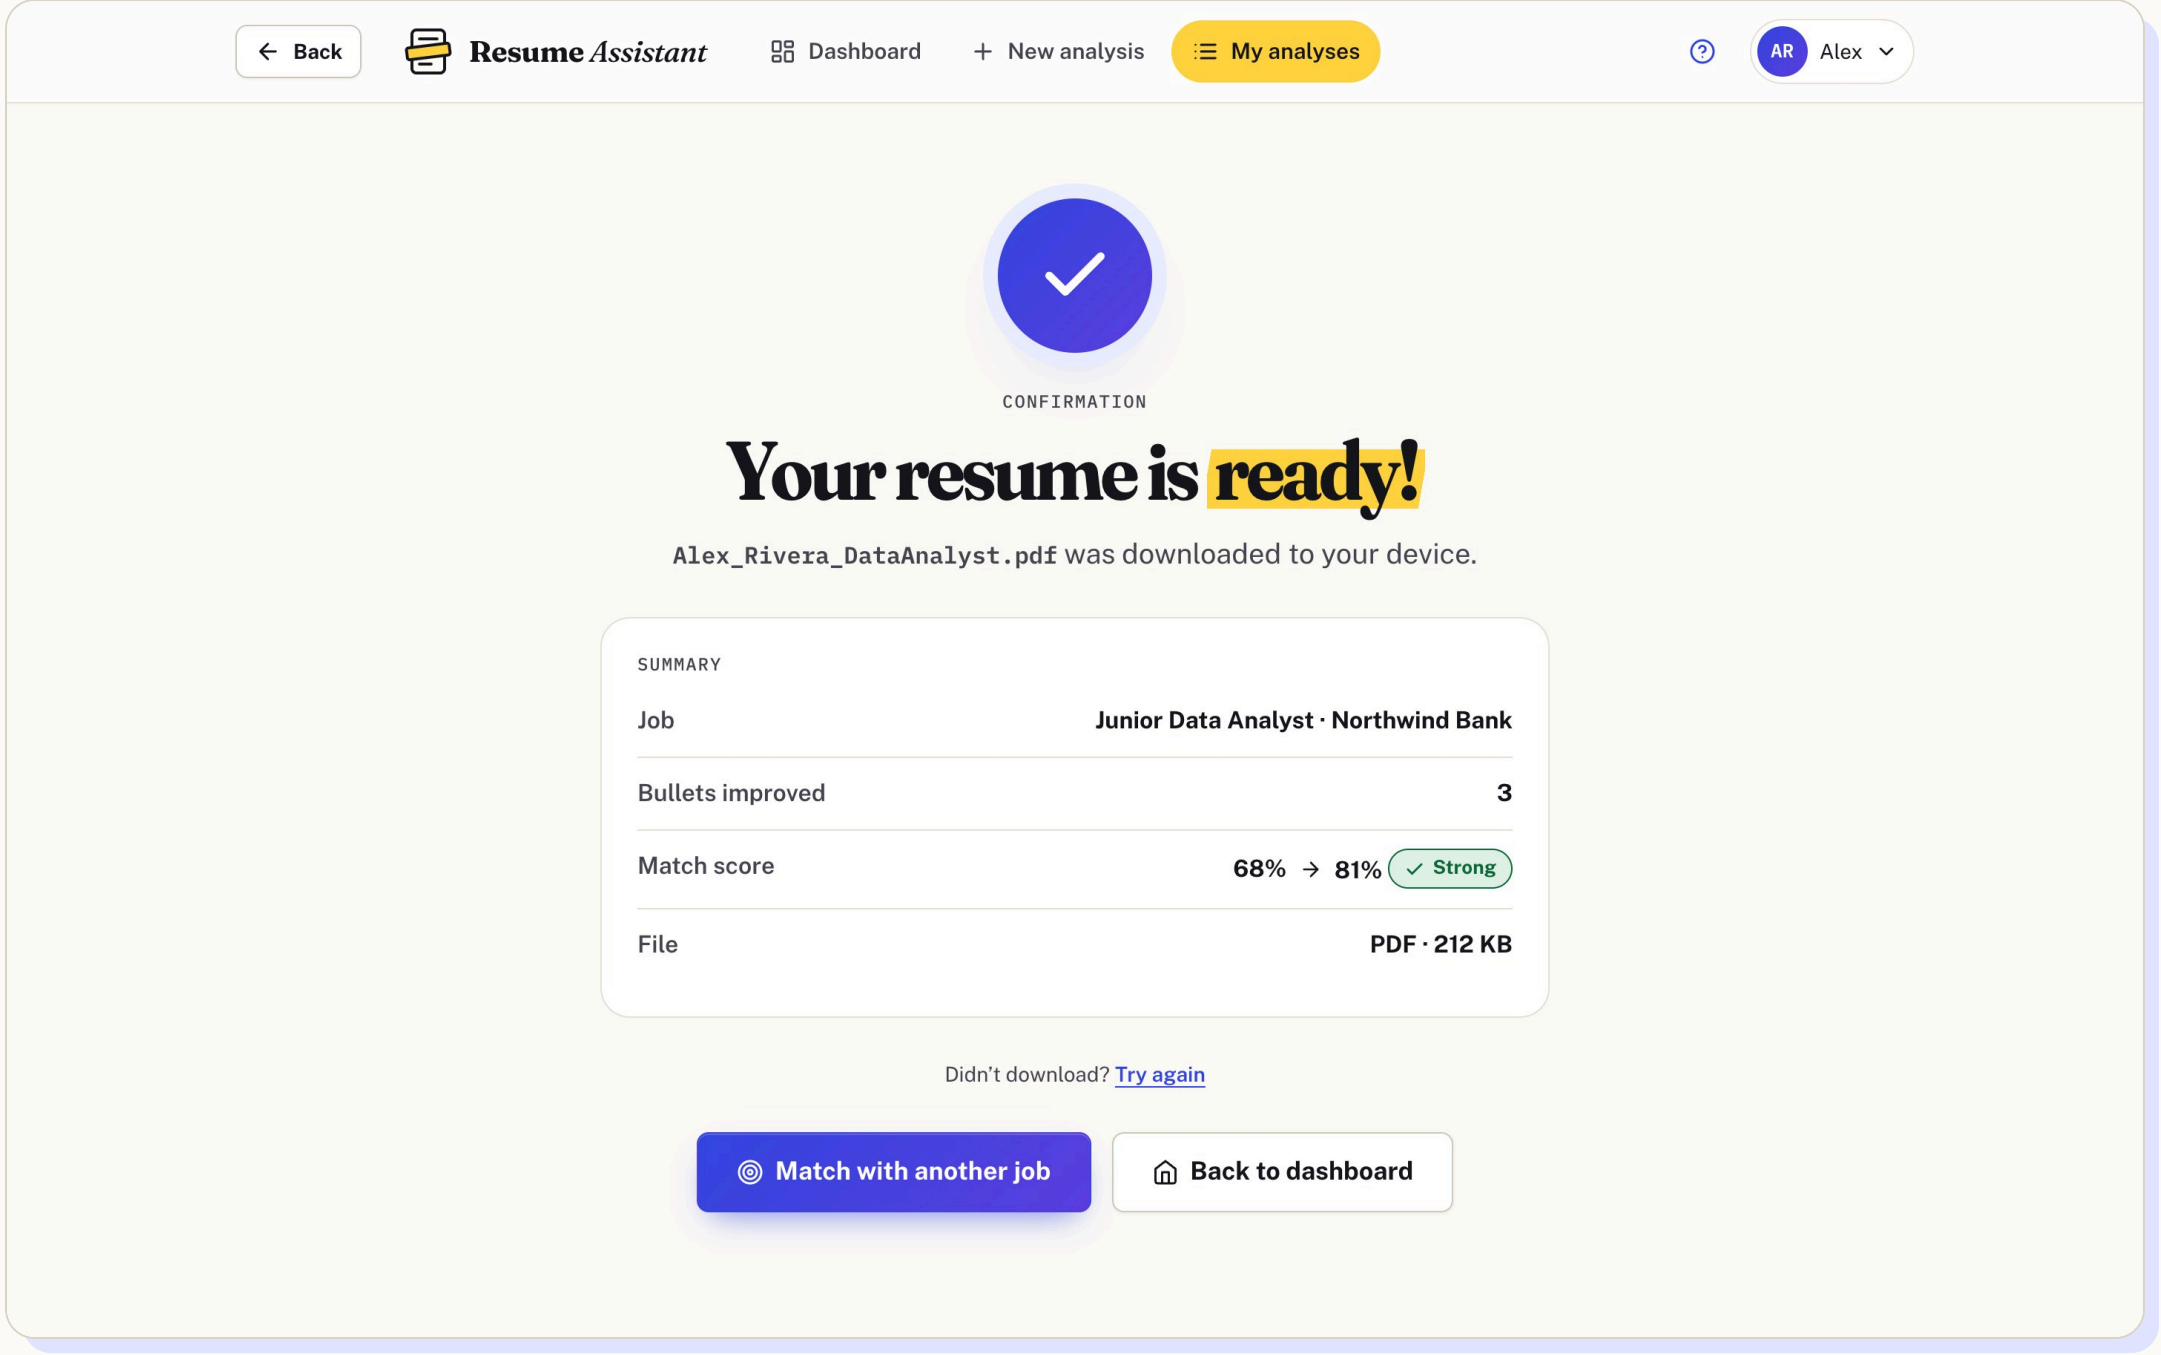

FR-6.1

- 1 Preview marks changed bullets with a bar, a tag and the word “Updated”.
- 2 Highlight toggle shows the final look; highlights never go into the file.
- 3 Before/after score confirms the effect of the changes.
- 4 PDF is pre-selected and the button says exactly what happens.

Confirmation

Task complete

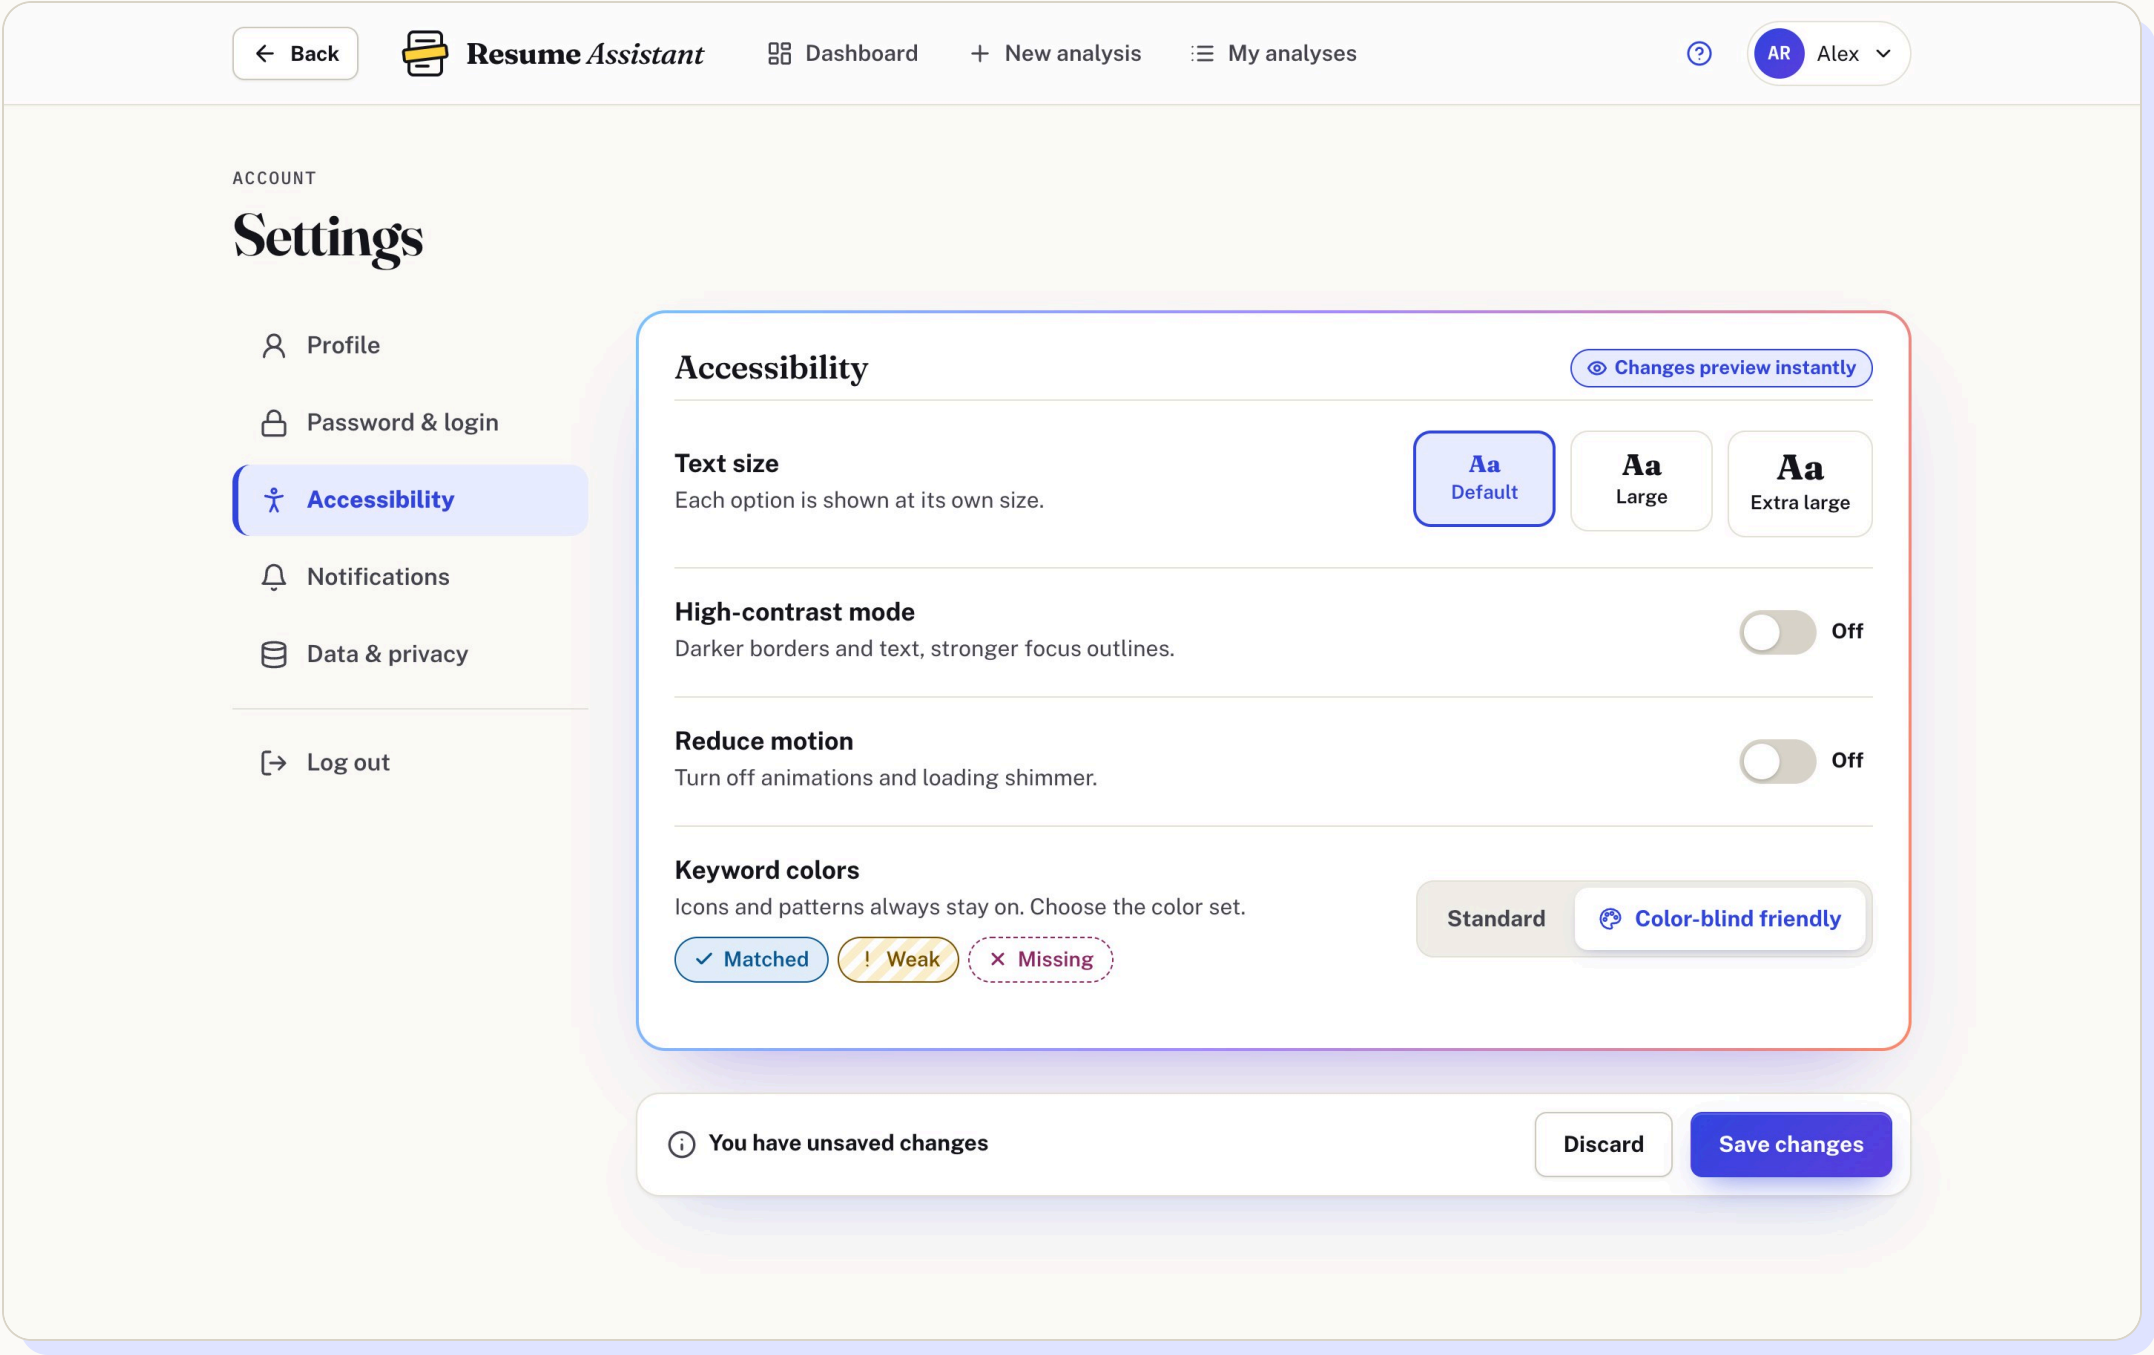

- 1 Big check, headline and exact file name confirm the task is finished.
- 2 Summary lists job, bullets improved, score change and file type.
- 3 No dead end: Match with another job (primary) or Back to dashboard.
- 4 Confetti is skipped when Reduce motion is on.

Settings • Accessibility

NFR-2.5 · FR-1.2

- 1 Grouped side menu; current group has a bar, bold text and a tint.
- 2 Text size options are each shown at their own size.
- 3 High contrast, Reduce motion and a colour-blind keyword palette (shown selected here).
- 4 Changes preview instantly; a sticky bar offers Save or Discard.

15 Errors & system feedback

Heuristics · NFR-3.2 · NFR-4.3

Plain-English messages that say what happened and what to do next, always with an icon, never colour alone.

Contrast & colour-blind safety

- 1
- Ratios are computed live from the CSS. All text pairs pass WCAG AA; most pass AAA.

01

Colors

Contrast ratios below are calculated live from the CSS, so they stay true if a color changes. Every text pair passes WCAG 2.1 AA (4.5 : 1).

Brand & neutrals

Aa17.1 : 1

Ink
#16171D · headings, body, primary button

Aa17.1 : 1

Paper
#FBFAF7 · page background

Aa12.4 : 1

Marker
#FFD23F · highlight, selected, primary shadow

Aa6.8 : 1

Indigo
#3446E0 · buttons, links, focus

Aa9.0 : 1

Ink 2
#FBFAF7 · secondary text

Aa6.0 : 1

Ink 3
#FBFAF7 · captions (12 px min)

Aa5.5 : 1

Violet
#F0EAF7 · gradient end, AI panels

Aa5.2 : 1

Coral
#FFECE6 · analyses, PDF files

Aa5.5 : 1

Mint
#DCF7EE · progress, best score

Status colors • always paired with an icon, a word and a pattern

Aa5.7 : 1

Matched / Strong ✓
#E0F2E6 · solid chip

Aa6.0 : 1

Weak / Fair !
#FDEFD2 · striped chip

Aa5.5 : 1

Missing / Low ✕
#FBE6E3 · dashed chip

Color-blind safe: never color alone
Left: normal. Right: the same chips in grayscale. They still read differently thanks to the icon (✓ ✕ !), the fill (solid, dashed, striped) and the word.

✓ SQL✕ Power BI! Statistics

✓ SQL✕ Power BI! Statistics

Alternate palette (Settings → Accessibility)
Blue / amber / purple, based on Okabe–Ito, for users with red-green color blindness.

✓ Matched! Weak✕ Missing

02 Typography

Fraunces (display serif) for headings, Public Sans (designed by the U.S. government for accessible interfaces) for body text, IBM Plex Mono for labels and numbers.

Display · Fraunces	Scan. Match. <i>Improve.</i>	48–68 / 700 · 1h 1.02
H1 · Fraunces	Match <i>results</i>	28–40 / 650
H2 · Fraunces	Keywords from the job	22 / 600
H3 · Public Sans	My resumes	17 / 700
Body · Public Sans	Upload your resume, paste a job posting, and see how well they match.	16 / 400 · 1h 1.5
Small / UI	Uploaded Sep 24, 2026 · 14 bullets	14 / 400–600
Label · Plex Mono	MAIN FEATURE 2 · MATCH RESULTS	12 / 500 caps
Caption (minimum)	PDF or DOCX only · up to 10 MB	12 / 500

T Readability rules

Body text is 16 px and nothing is smaller than 12 px. Line height 1.5, lines under ~80 characters, left-aligned, sentence case. All sizes use rem, so Settings → Text size scales the whole UI to 125% or 150% without breaking layout.

Style guide · Typography

Readable text

- 1 Fraunces for headings, Public Sans for body, IBM Plex Mono for labels. 16 px body, 12 px minimum.

03 Components

8-point spacing grid. Radius 8–10 px on buttons and inputs, 14–20 px on cards, pill for badges. Cards are white with soft, slightly blue shadows; the primary button uses the indigo-violet gradient.

Score = number + ring + word + icon. Color is never the only cue.

Step bar • analysis flow

18

Style guide • Components

Buttons, forms, feedback

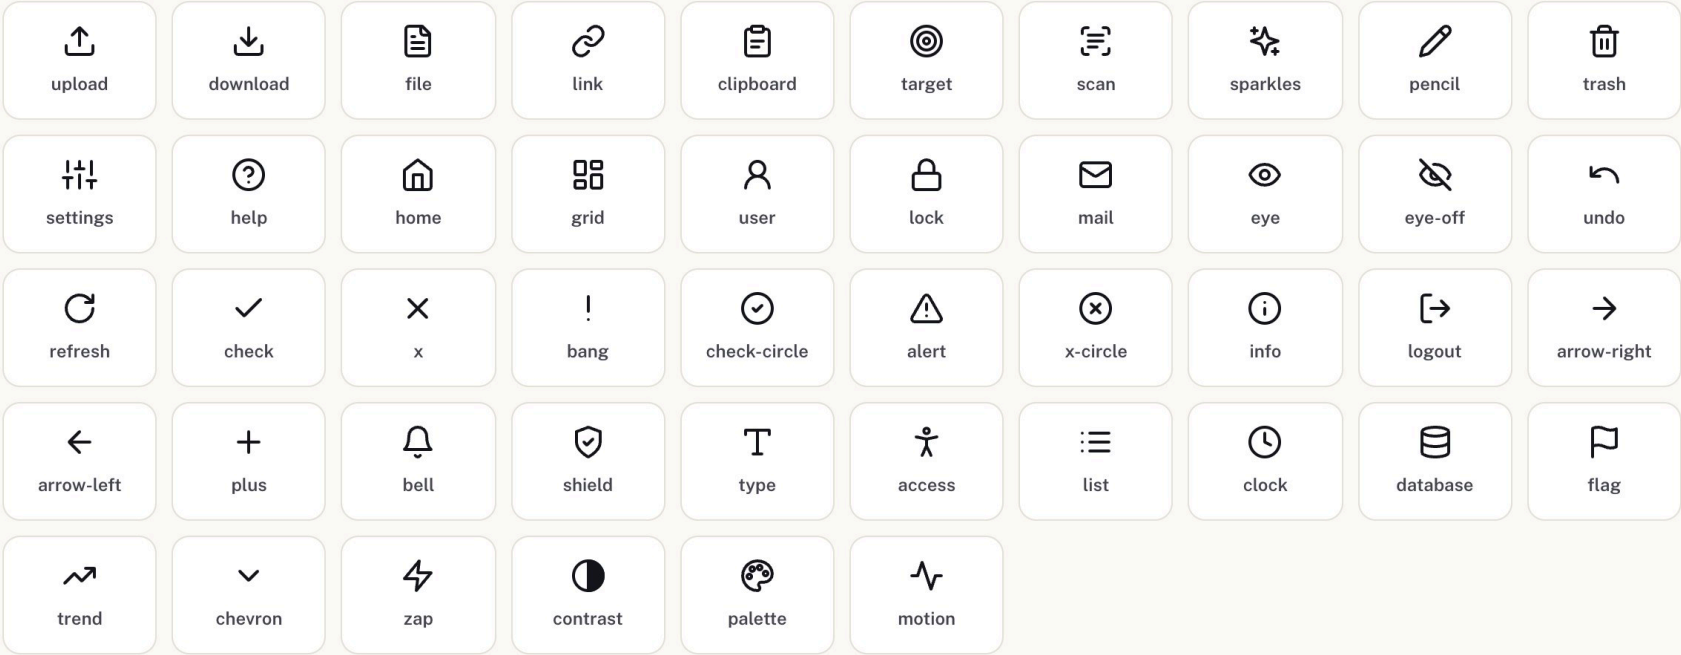

- 1 Every state is shown: default, focus, disabled, loading, success, warning and error.

24 px grid • 2 px stroke

- 1 Icons always come with a text label; icon-only buttons have an accessible name and a tooltip.

04 Icons

24 px grid, 2 px round stroke. Icons always come with a text label; icon-only buttons have an accessible name and a tooltip.

20

Assignment checklist

- ✓ **Style guide**
colours with contrast ratios, fonts, button shapes and states, icons (pages 16–19)
- ✓ **All required pages**
welcome, login, dashboard, 4 main features, settings, confirmation
- ✓ **UI/UX principles**
consistent layout, simple navigation, feedback indicators
- ✓ **Usability heuristics**
system status, recognition over recall, error prevention
- ✓ **Accessibility**
WCAG AA contrast, colour-blind safe status, 16 px text, clear labels
- ✓ **Exported to PDF**
this document

Built as a clickable high-fidelity prototype in HTML, CSS and JavaScript (in place of Figma), so every screen and state can be tried live.

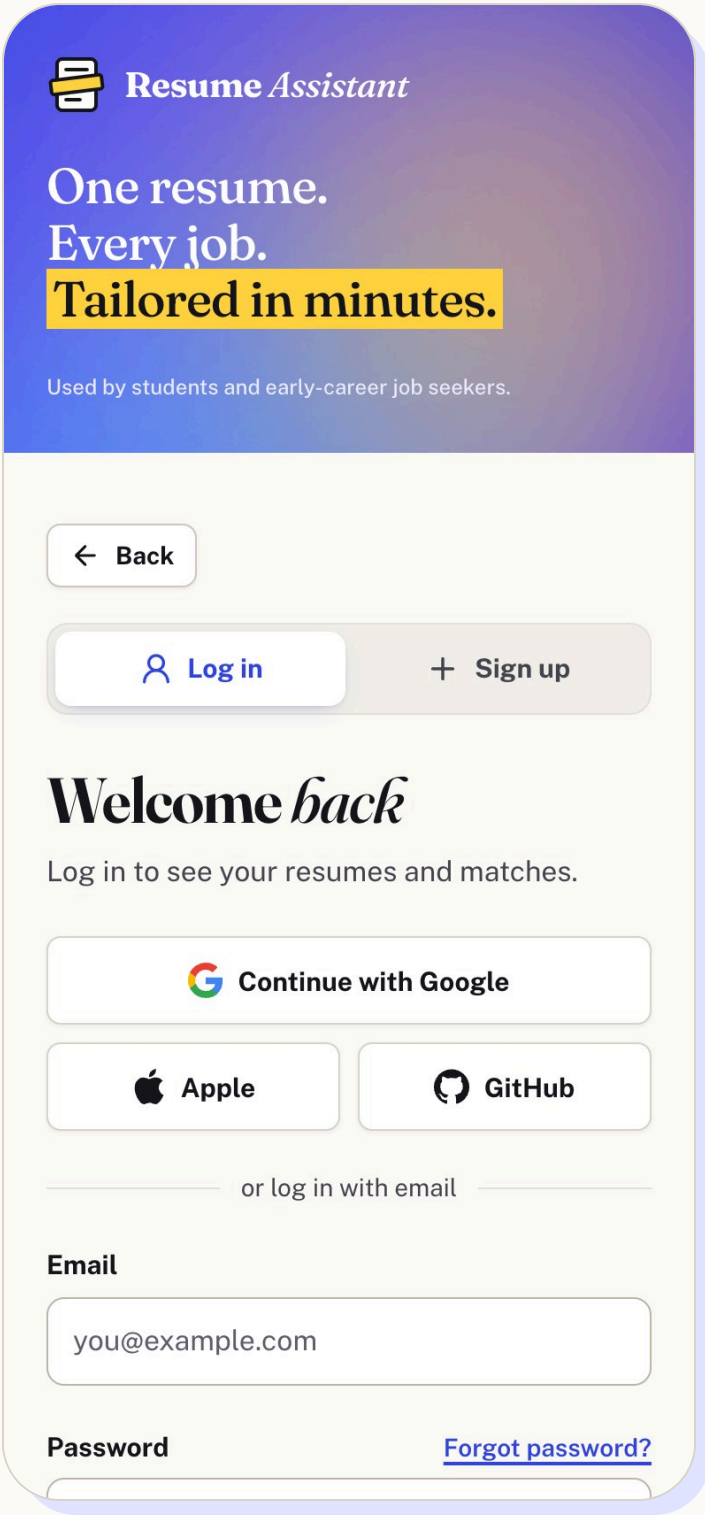

05 Design principles applied

PRINCIPLE	HOW IT SHOWS UP	WHERE
Consistent layout	Same top bar, page title position, one primary button (indigo gradient) and the same step bar on every flow screen.	All signed-in pages
Simple navigation	Three top links; they become a labelled bottom tab bar on phones. Done steps in the step bar are clickable to go back.	Dashboard, flow
Visibility of system status	Upload progress with % and bytes, “Reading job posting...”, “Writing 3 options...”, toasts after saving, “1 of 3 bullets improved”.	Dashboard, Job, Improve
Recognition over recall	Chosen resume stays visible, original bullet stays above the AI options, recent analyses show score and label.	Job, Improve, Dashboard
Error prevention	File rules shown before upload, Caps Lock warning, disabled Create account until valid, AI “check this skill” flag, type DELETE to delete account.	Login, Dashboard, Improve, Settings
Help users recover	URL fails → paste description in one click; AI down → edit manually; every delete has Undo or a confirm dialog.	Job, Improve, Dashboard
Contrast	All text ≥ 4.5 : 1 (most ≥ 7 : 1); focus ring is a 3 px blue outline with a white gap; high-contrast mode.	Global, Settings
Color-blind safe	Status = icon + word + pattern; optional blue/amber/purple palette.	Results, Settings
Readable text & clear labels	16 px body, 12 px minimum, text size up to 150%, visible labels above fields, buttons say what they do (“Delete resume”, not “OK”).	Global

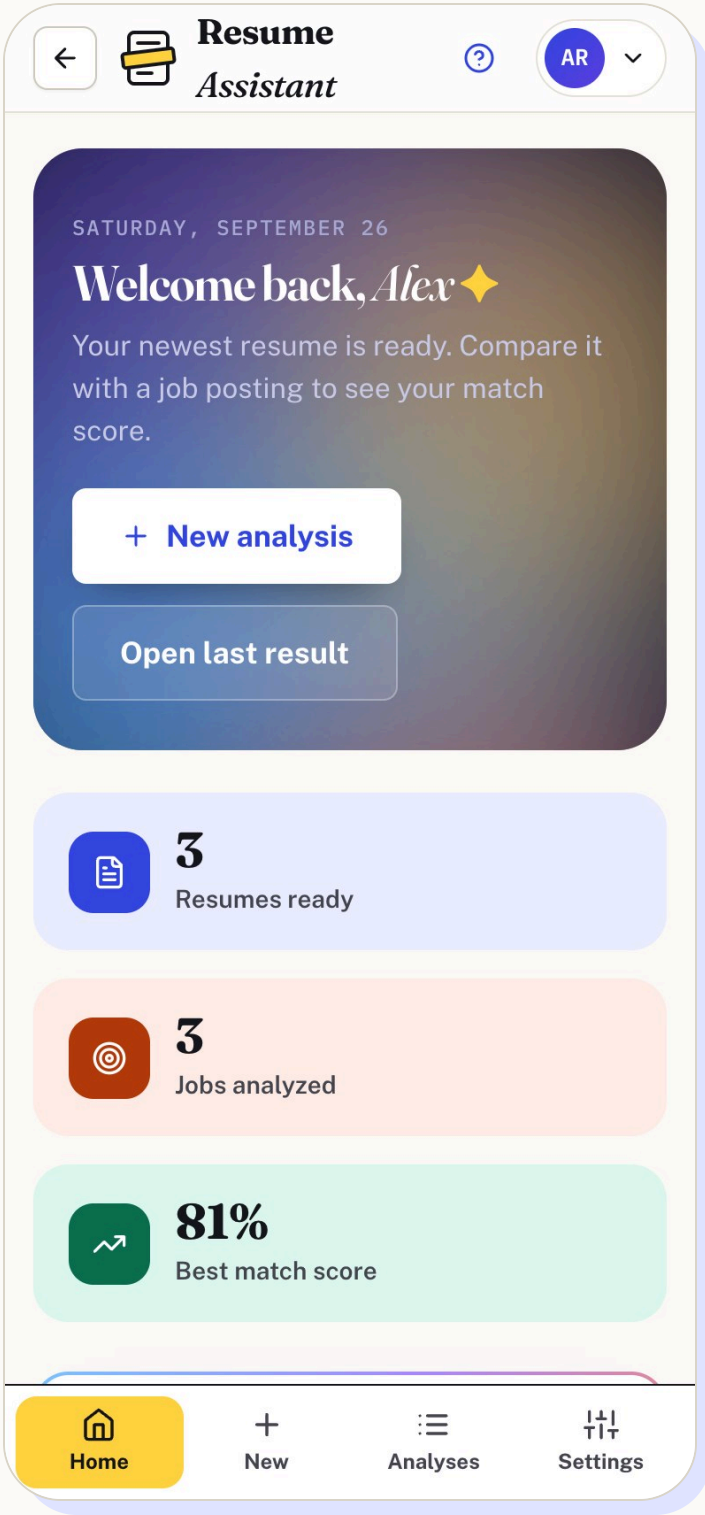

21 Mobile views

Responsive · NFR-3.3
